GERALD BACHLMAYR

GERALD BACHLMAYR

Chief Architect – AWS, Anchor

BIOGRAPHY

Gerald is the Chief Architect – AWS at Anchor. He is focusing on application modernisation utilising AWS Cloud Native services. He is passionate about solving business problems with strategic solutions to enable quick release cycles, whilst also reducing complexity and cloud hosting fees. As a public speaker, he is keen on sharing his insights and learnings with the community to make the cloud an even better place.

How to plan and execute your application modernisation roadmap

As a business you need to react quickly to changing
